Professional PMMA
denture base
material

Making People Smile

From professionals for professionals

ProBase, our top-of-the-line denture base material, is the result of many years of experience in conventional pouring and packing techniques. The material offers pleasant processing properties and is available in a wide selection of shades.

For more comfort when using denture base materials.

Versatile
possibilities

ProBase
Hot

- ✓ Heat-curing denture base material for the conventional packing technique
- ✓ Smooth consistency
- ✓ Three different polymerization methods

ProBase
Cold

- ✓ Self-curing denture base material suitable for the pouring and packing technique
- ✓ Excellent flow and moulding properties
- ✓ Available in an additional shade for an increased masking effect

Ivoclar
denture base
shades

- ✓ Uniform shade standard across different systems
- ✓ Shade conformity between heat- and cold-curing materials
- ✓ Cold-curing materials: additionally suitable for repairs and relines

Additional
shade
options

- ✓ Individual characterizations with our light-curing SR Nexco lab composite
- ✓ Gingiva materials designed for the individual requirements of patients
- ✓ Additional intensive gingiva shades
